

Bugs in Microscopy Test Assignment

3/6/14

Flow cytometry

Fixed always appears in gray, even after a sample is selected

Microscopy

When turning light off and laser on, the filter switches to "R"

The image that appears is not the "R" image, but the "A" image

On the microscopy prep page, the radio button does not appear when selecting antibody labeling IF

Completely new images were appearing when moving between filters, instead of just the appropriate single channel image
